PROJECTS

A personal portfolio website

📅 Present 📍 Location

Short summary of your work

- A personal portfolio website showcasing skills, projects, and experience. Features a clean, responsive design built with modern web technologies, highlighting expertise in **frontend development**, **backend integration**, and **full-stack projects**. Includes interactive sections for project demos, a resume, and contact information to engage potential employers or clients.

E-commerce Product Page

📅 12/2024 📍 Location

Short summary of your work

- A full-stack e-commerce product page featuring a seamless user interface for browsing, selecting, and purchasing products. Built with **React.js** for the frontend, **Node.js** and **Express.js** for the backend, and **MongoDB** for database management. Includes dynamic product displays, user authentication, a shopping cart, and secure payment integration, offering a smooth and interactive shopping experience.

To-Do App

📅 11/2024 📍 Location

Short summary of your work

- A To-Do app that allows users to create, manage, and track tasks efficiently. Built with **React.js** for the frontend, enabling a responsive user interface, and **Node.js** with **MongoDB** for backend functionality, including task storage and management. Features include adding, editing, deleting, and marking tasks as completed, offering a simple yet effective solution for task organization.
